

The icons for the options and the store are different sizes.

The store button looks like a home button.

The player name display looks like you can click on it to change the name but it should be in the options.

The font looks like someone wrote it and the background for the text does not make sense

The Icons for the gold coin and gem

I made the icons the same size

Changed the font

Changed the player name box

Bring everything closer to the center
The font again
Put the name on a card

I pulled everything in from the edges so they would be easier to see and click on it.
I changed the font for the assets and the player name and put the player name on like a business card
I designed the new look of the gold coin and the gem to make them look more interesting.
